PROFESSIONAL SUMMARY

Results-driven Frontend & MEAN Stack Developer with hands-on experience building enterprise-level ERP, POS, LMS, and real-time communication platforms using Angular, JavaScript, TypeScript, Node.js, Bootstrap, Tailwind CSS, NgRx, and .NET-integrated systems. Skilled in architecting scalable frontend systems, optimizing application performance, implementing complex business workflows, and creating premium responsive UI/UX experiences.

Experienced in enterprise application development with deep knowledge of Angular state management, ERP workflows, billing systems, real-time synchronization, analytics dashboards, and REST API integration. Passionate about building high-performance production-grade applications with clean architecture and modern frontend engineering practices.

TECHNICAL SKILLS

Frontend

- Angular 17+
- JavaScript
- TypeScript
- HTML5
- CSS3
- SCSS

Backend

- Node.js
- Express.js
- .NET Integrated APIs

State Management

- NgRx
- RxJS

- Signals

UI Frameworks

- Bootstrap 5
- Tailwind CSS
- PrimeNG
- Angular Material

Database & Cloud

- MongoDB
- Firebase

Tools & Libraries

- Git
- VS Code
- ApexCharts
- DataTables.net
- JWT Authentication
- REST API Integration

PROFESSIONAL EXPERIENCE

Frontend Developer

Dimind Innovation | Oct 2025 – Present

- Developing enterprise-grade ERP and POS applications for the Food & Beverage industry using Angular 17+, NgRx, RxJS, Bootstrap 5, PrimeNG, and .NET backend integrations.
- Built advanced billing workflows including split payments, tax calculations, combo handling, order merging, and dynamic pricing systems.
- Implemented real-time synchronization systems for kitchen display management and order tracking.
- Optimized high-frequency UI rendering and enterprise state management for large-scale business applications.
- Created analytics dashboards and data visualization modules using ApexCharts and modern frontend architecture.
- Worked on scalable modular architectures supporting POS, HR, CRM, Inventory, and Reporting systems.

Frontend Developer

Kayool Technologies Pvt. Ltd. | Dec 2024 – Jun 2025

- Developed responsive Angular enterprise applications with reusable UI architectures.
- Built component-driven frontend systems using Angular, TypeScript, HTML, and SCSS.
- Worked with REST APIs, authentication systems, and enterprise dashboard modules.
- Improved frontend performance and UI responsiveness across devices and browsers.
- Collaborated in Agile development environments with backend and QA teams.

Frontend Developer Intern

Inmakes Infotech Pvt. Ltd. | May 2023 – Nov 2023

- Developed responsive web interfaces using Angular, Bootstrap, and Tailwind CSS.
- Implemented reusable UI components and optimized frontend responsiveness.
- Integrated APIs and improved application usability and browser compatibility.
- Worked on education-based platforms and responsive dashboard systems.

FEATURED PROJECTS

Yrez – Unified F&B ERP & POS System

Tech Stack: Angular 17+, TypeScript, NgRx, RxJS, Bootstrap 5, PrimeNG, Firebase, .NET APIs, ApexCharts

Project Overview

Developed a large-scale enterprise ERP and POS platform specifically designed for the Food & Beverage industry. The system streamlined restaurant operations including billing, kitchen management, inventory, CRM, HR, reporting, and real-time order tracking.

Key Contributions

- Engineered a sophisticated POS workflow system featuring:
- Variants
- Modifiers
- Recursive combo handling

- Dynamic price aggregation

- Implemented enterprise-scale state management using:

- NgRx Store

- Effects
- Selectors

- RxJS data streams

- Built advanced billing systems supporting:

- Split payments
- Order merging
- Tax automation
- Discounts
- Service charges

- Coupon systems

- Developed real-time Kitchen Display Systems (KDS) with live order synchronization.

- Created interactive table booking and reservation systems with multi-table handling and drag-drop functionality.

- Optimized performance for high-frequency enterprise UI updates and large-scale data rendering.

- Built analytics dashboards for:

- Sales reports
- Inventory tracking
- Employee productivity
- Business insights

Why This Project Stands Out

- Enterprise-grade architecture
- Complex business logic implementation
- Real-time synchronization systems
- Modern Angular 17 ecosystem
- ERP + POS domain expertise
- Advanced frontend engineering practices

ConnectNow.ai

Tech Stack: Angular, TypeScript, Bootstrap, REST APIs

- Developed real-time communication interfaces including:
- Live Chat
- Voice Calls

• Video Interactions

• Integrated AI-driven UI workflows and smart interaction systems.

• Built scalable reusable frontend components and optimized application performance.
• Improved responsiveness and cross-browser compatibility.

Cambridge Group of Institutions

Tech Stack: Angular, Bootstrap, REST APIs

• Developed educational management portals with role-based dashboards.
• Built attendance systems, academic tracking, announcements, and LMS features.
• Implemented responsive UI systems and API-driven data management modules.
• Focused on performance optimization and user-friendly workflows.

LANGUAGES

• English
• Malayalam
• Tamil

CAREER HIGHLIGHTS

• Enterprise ERP & POS Development Experience
• Advanced Angular 17 Frontend Architecture
• Real-Time Synchronization Systems
• Complex Billing & Workflow Logic
• Enterprise State Management with NgRx
• Responsive & Premium UI Development
• High-Performance Frontend Optimization
• Production-Level Application Experience
